Ludlum Measurements, Inc.

Radiation Detection for a Safer World

Ludlum Measurements, Inc. has been designing, manufacturing and supplying radiation detection and measurement equipment in response to the worlds' need for greater safety since 1962. Throughout its nearly five decade history, it has developed radiation detection technologies and instruments in support of enhancing the safety of personnel, the environment and securing borders. Its wide product line includes survey meters, detectors, isotopic identifiers, dosimeters, environmental monitors, contamination monitors, security systems and Networking software. Ludlum's success and longevity are the result of its ongoing investment in developing new products and commitment to high quality, reliability, durability, affordability and superior long term support.
