

Solutions for low and intermediate-level radioactive waste on a European Scale

SOCODEI was assigned the task of designing, financing, building, and operating facilities that contribute to enhance environment protection.

SOCODEI now proposes processing solutions for a wide variety of industrial waste that are not only adapted to today's strict requirements but that are environmentally-friendly too.

All ultimate waste forms are routed to the final surface storage site. From production site waste collection to ultimate waste form transportation to the storage site, SOCODEI provides services comprehensive range to its customers.
