

URENCO is an independent, global energy and technology group with production from plants in Germany, the Netherlands, United Kingdom and a fourth enrichment plant currently under construction in New Mexico, US. Focus is on providing safe, cost effective and reliable uranium enrichment services for civil power generation within a framework of high environmental, social and corporate responsibility standards.

After almost 40 years of continuous development URENCO operates in a pivotal area of the nuclear fuel supply chain for the generation of electricity for consumers around the world. With industry-leading centrifugal technology and around 25% global market share, URENCO's goal is to further increase worldwide market share while maintaining high profitability to become the leading supplier in the extended global enrichment market.
