

NICE to see you here!

Tellervo Taipale
Chairperson of NICE

NICE - Nuclear Information Committee Europe

- ◆ NICE is a joint initiative of the European Nuclear Society (ENS) and the European Atomic Forum (FORATOM).
- ◆ NICE increases the effectiveness of nuclear communication activities in Europe.
- ◆ NICE proactively identifies current and future communication issues of common interest.

- 
- The background of the slide features a stylized globe with a grid of latitude and longitude lines. A satellite dish is positioned in the center, pointing towards the top right. The globe is rendered in shades of green and yellow, while the grid lines are light blue. The overall background color is a deep blue.
- ◆ NICE acts as a vehicle for initiation, evaluation and co-ordination of communication issues, so the same issues and statement appear and are used both on national and European level, the latter also in case of the European Institutions.
 - ◆ The governing bodies of ENS and FORATOM are the first to be informed of the recommendations and actions by NICE. These bodies have the possibility to influence on the activities of NICE and give their recommendations as well.

Current communication issues

NICE has identified e.g.

- ◆ Climate change
- ◆ Chernobyl 20 years. Chernobyl Fact File is based to an initiative of a NICE subgroup.

NICE members

- ◆ NICE has one person per country. Members are nominated by the FORATOM and ENS constituencies.
- ◆ Other observers include organisations such as: ENS Young Generation, NucNet, World Association of Nuclear Operators (WANO), World Nuclear Association (WNA), World Nuclear Transport Institute (WNTI) and Women in Nuclear (WIN).

NICE Meetings

The ambition is to have three meetings annually. One of them is always during PIME.

Thank you for your attention!

When the lights go on in Europe...

...half of them are
nuclear-powered

Secure and clean air energy
you can rely on.
