

PIME AWARD 2009 Candidate

BRITISH ENERGY

As the UK's largest producer of electricity from nuclear energy British Energy is actively promoting the recruitment and retention of a sustainable talent pool of young engineers and researchers – the people who really represent the UK's nuclear future. This objective lies at the heart of British Energy's Hi-Energy Partnership campaign.

The UK needs to more than double (from 12% to 25%) the number of graduates leaving university with a science, engineering or technology degree if predicted growth in jobs is to be matched. **The Hi-Energy Partnership campaign revolves around a strategic partnership between British Energy's Sizewell B NPP and a local school, Leiston High School.** The objectives are to promote Sizewell B as a first class employer, to promote the apprenticeship courses it offers in mechanical engineering, to provide students with on-the-job experience and to promote the nuclear sector as an attractive career option for young science graduates.

Here are some examples of some of the main components of the campaign:
